

## WATER INFRASTRUCTURE & WASTEWATER SERVICES //

### The national reach and resources you need to improve program flow

SAM is the industry-leader in geospatial services. We deliver the comprehensive site layouts, inspection expertise, and high-resolution data that water agencies, municipalities, and public sector clients require to plan, design, build, and monitor their water infrastructure, wastewater facilities, pipelines, and transmission conveyances with confidence.

SAM's water infrastructure support and asset management experience is unrivaled. Our clients regard us as more than a service provider—we're an essential partner in their operational success.

## Improve asset management with faster, more accurate results

### **We provide turnkey solutions.**

We provide a deep suite of geospatial services, giving you have a wealth of expertise available to solve unexpected challenges as they arise. From hydrographic geomatics to subsurface utility engineering to system routing, we bring all the expertise you need to build out and modernize your infrastructure.

### **Our technology is a game-changer for our clients.**

We invest in the industry's best technology—even working with our manufacturing and software partners to improve their products and deliver even greater value to our clients. With better data, our clients can manage their assets more efficiently and identify potential problems before they impact customers.

### **We put clear communication first.**

SAM works upfront with stakeholders to identify their water infrastructure program's objectives—and agree on a unified vision. We're adept at managing multiple channels of communication and delivering the documentation clients need to complete both local- and national-scale programs at speed. We produce some of the easiest-to-use deliverables in the industry, so they integrate seamlessly into client workflows.

### **Our experience speaks for itself.**

Our water industry team includes TWIC-certified professionals and licensed geomatics experts adept at managing fast-track program schedules.
