

MAINTENANCE AND SUPPORT //

GIS

SAM is tirelessly committed to supporting our client's GIS goals and efforts. From remote and on-site training to technical support and maintenance, our dedicated professionals keep each client moving in the right direction.

Beyond just data development, our experienced GIS staff provides routine maintenance for clients all over the North America in a streamlined, cost-effective manner. Our work is done in-house from beginning to end, without compromise. We have dedicated support staff ready to assist with all technical GIS needs.

Additionally, our team of consulting professionals assess internal processes, audit current GIS data and software architecture. Our support is focused on maximizing

investment, correcting current problems, and developing a successful long-term plan for implementation and management processes in your organization.

Key Services:

- Consulting
- Enterprise Implementation and Training
- Onsite and Remote Technical Support
- GPS and GIS Data Maintenance and Updates

What differentiates SAM?

SAM has built a reputation as a trusted, knowledgeable, and innovative partner. SAM transforms petabytes of complex spatial data into intelligent insights in a holistic Managed Geospatial Services™ (MGSTM) framework. As North America's premiere MGSTM company, SAM provides practical, precise, and high-fidelity solutions designed to enhance decision-making, mitigate risks, achieve strategic objectives, and drive costs out of our client's business. Our vision is to advance spatial data acquisition, improve analysis capabilities, and develop predictive analytics to redefine and transform how infrastructure assets are developed and managed throughout their lifecycles.
